EXAMINER'S AMENDMENT
AND
REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest individually or in combination a method of customizing a web page by sensing a user's access of objects included in the web page (note that by "access" it means using the functions provided by the objects after the objects are locally displayed) or objects that are specified by the user in advance. The web page is customized in such a fashion that **only** the objects that have been used for a predetermined number of times **or** the pre-specified objects that have been used for the predetermined number of times would be included in a web page for the user's subsequent visits.

2. The closest prior art of record, such as U.S. 6014638 (a patent issued to AOL), has focused on profiling a user's web browsing behavior and uses the information gathered for constructing a user-specific web page. However, none of it specifically excludes objects, from the customized web page, that have not been used for a predetermined number of times.

3. The abstract is re-written to incorporate subject matter that reflects more precisely of the invention (see the attached page).

ABSTRACT OF THE DISCLOSURE

A method of customizing a web page by sensing a user's access of objects included in the web page or objects that are specified by the user in advance, wherein by "access" it means using the functions provided by the objects after they are locally displayed. The web page is customized in such a fashion that only the objects that have been used for a predetermined number of times or the pre-specified objects that have been used for the predetermined number of times would be included in a web page for the user's subsequent visits.
